

JAMES CLAIR

FOR
YREKA CITY COUNCIL

I am not a career politician, nor do I aspire to be one. My sole focus is on improving our city while preserving its small-town character. I am committed to working with fellow council members and the community to address both the big challenges and the smaller issues we face. I believe in using a collective approach to achieve our shared goals. We will work together to strengthen our community. I recognize that I won't have all the answers, and I understand that difficult decisions will need to be made, but every decision I make will be with the long-term benefit of our town in mind.

5th generation Yrekan

Serves on the board of the YMCA

Formerly a member of the TASK Force, Weed Police Department and Sheriff's office.

Strong family commitment to the city.

Community Volunteer

Currently an Investigator with the District Attorney's Office

PRIMARY INITIATIVES

Business Focus

Transform vacant buildings into thriving businesses in an effort to support local entrepreneurs and attract new employers.

Redevelop vacant lots into affordable housing that will attract new residents, boost local businesses, and address housing challenges.

Housing Stability

Community Resiliency

Take a proactive approach to fire risk reduction by collaborating with the city OES Resiliency Officer and people at the state level. Invest in our fire department in an effort to improve Yreka's safety and insurance landscape.

Reopening Ringe Pool would enhance community life, support youth swim programs, and promote sustainability through renovation and energy-efficient systems.

Revitalizing Ringe Pool

Community Engagement

Promote Yreka's vibrancy through increased community events, park revitalization, and farmers' markets, to foster an active community and strengthen its historic charm.

Keep moving forward with shelter construction. Explore state and federal grants dedicated to unhoused prevention and affordable housing. Clean up appropriate areas of the city that have been impacted by the unhoused. Try and develop loitering solutions to help with businesses affected.

Homelessness
